**DETAILED ACTION**

***Specification***

1. The amendment filed 6/5/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The addition of sodium acetate as a monovalent salt is not supported by the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 10 teaches sodium acetate which was not taught in the specification as originally filed.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 7-9 and 12-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Stern (5026735).

Stern teaches a foamed aqueous fluid which comprises hydroxypropyl guar and sodium lauryl sulfate (see example 8), and may comprise various salts (column 9, lines 1-39). To the extent that the foamed fluid has the viscosity for qualities between 80 and 95% as listed in claim 16, such is anticipated. Applicants intended use as a drilling fluid does not distinguish over the prior art (In re Pearson 181 USPQ 641).

6. Claims 1-4, 7-11 and 13-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Thompson Sr. (6302209 B1).

Thompson teaches a foamed aqueous fluid which may be used in drilling (column 3, lines 47-52). Various guar derivatives may be used as a polymer component of the foam (column 21, lines 49-62), with hydroxypropyl guar taught in US 5,247,955 which was incorporated by reference. Examples 1 and 2 teach a foam which contains

Art Unit: 1712

potassium chloride, and which utilizes a solid salt of lauryl sulfate (column 28, lines 8-9).

The only salts of lauryl sulfate taught are the sodium forms in Table 1 at columns 11 and 12, and the use of such would be clearly envisaged by one of ordinary skill in the art. To the extent that the foamed fluid has the viscosity for qualities between 80 and 95% as listed in claim 16, such is anticipated.

7. Applicants amendment has overcome the rejections of the previous office action, however new rejections are presented over Stern and Thompson in this action.
